Date Repaid <sup>1</sup> :	N/A	State:	Louisiana

American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP) and Community Development Capital Initiative (CDCI). To answer that question, Treasury is seeking responses that describe generally how the CPP/CDCI investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP/CDCI investment was deployed or how many CPP/CDCI dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP/CDCI capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP/CDCI funds were outstanding).

Increase lending or reduce lending less than otherwise would have occurred.			

<sup>&</sup>lt;sup>1</sup>If repayment was incremental, please enter the most recent repayment date.

Carter F	ederal Credit Union	
Purc	hase another financial institution or purchase assets from another financial institution.	

X Held as non-leveraged increase to total capital.

Credit unions are considered "Well Capitalized" as long as their Net Worth ratio is at or above 7.00%. Carter FCU was above the 7.00% threshold prior to the CDCI infusion, however the additional capital has provided breathing room.

What actions were you able to avoid because of the capital infusion of CPP/CDCI funds?				

(Include Holding Company Where Applicable)

Carter Federal Credit Union

What actions were you able to take that you may not have taken without the capital infusion of CPP/CDCI funds?				
Credit unions are required to maintain a Net Worth ratio of 7.00% to be considered "Well Capitalized." Prior to the CDCI infusion, Carter's				
Net Worth ratio was just slightly higher than 7.00% due to robust growth in member deposits. The CDCI program allowed us to continue				
offering worthwhile dividends on our members' share accounts without having to worry that additional asset growth might drag our Net				
North ratio below the 7.00% threshold.Carter FCU was also able to move forward with investments in new initiatives that would hamper				
earnings growth in the near term. Without the CDCI, management would have likely feared that the short-term impact to earnings of the				
new projects would cause a reduction in the Net Worth ratio to an undesirable level. The investments in new projects afforded by the CDCI				
will ultimately prove to make Carter FCU a financially stronger credit union while better serving its members and the communities we call				
home.
